
Meridian 1

Basic and Network Alternate Route Selection

General description

Document Number: 553-2751-100

Document Release: Standard 9.00

Date: October 1997

Information is subject to change without notice. Northern Telecom reserves the right to make changes in design or components as progress in engineering and manufacturing may warrant. This equipment has been tested and found to comply with the limits for a Class A digital device pursuant to Part 15 of the FCC rules, and the radio interference regulations of Industry Canada. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at this own expense.

Revision history

October 1997

Standard 9.00 for X11 Release 23.0x.

August 1996

Standard 8.00 for X11 Release 22.0x.

December 1994

Standard 7.0. This document is reissued to include updates and changes for X11 Release 20. All updates are noted with revision bars in the margins.

July 1994

Standard 6.00. This Release introduces the following X11 Release 20 features and capabilities:

- Interchangeable Numbering Plan Area Codes, and
- Federal Communications Commission Equal Access Carrier Access Code Expansion.

All changes are indicated with change bars closest to the outside edge of the page.

August 1993

This document is reissued for updates and changes resulting from X11 Release 19.

August 1992

This document is reissued to include information on system option 81 and equipment required for compatibility with X11 Release 18.

December 1991

This document is reissued to include technical content updates.

December 1990

This document is issued to include updates and changes for X11 Release 16.

Contents

Introduction	1
Document overview	2
Terminology	3
Other documentation	3
 Basic/Network Alternate Route Selection	 5
Access codes	5
BARS access code	5
NARS access codes	6
End-of-dial timing	6
Network translation	7
11-digit BARS or NARS translation	8
Uniform dialing plan	8
End-of-dial timing	8
UDP for on-net calling	9
UDP for off-net calling	11
Flexible numbering plan	14
Dialing transparency	14
Automatic least-cost routing	15
Route eligibility	16
Digit manipulation	16
Time of day routing	17
Routing control	18
NCOS map	19
Invoking routing control	19

Network class of service	20
Network control	22
Facility restriction level	24
Automatic on-net to off-net overflow	25
Multiple DID office code screening	25
Incoming trunk group exclusion	26
Off-net number recognition	27
Supplemental digit restriction (release dependent)	30
Digit translation/restriction/recognition	30
Free calling area screening	34
BARS or NARS bypass control	35
Network speed call	35
Network call transfer	36
1+ dialing	38
Interchangeable numbering plan area codes impact	39
Network signaling	41
Application	42
Requirements	43
Satellite link control	44
Flexible ESN "0" routing	45
Federal Communication Commission equal access carrier access code expansion impact	46
Dialing plan considerations	47
Carrier access code dialing sequences with special characters	48
Configuring equal access within a network	48
Network traffic measurements	49
TFN001 routing measurements	49
OHQ measurements	49
CBQ measurements	50
TFN002 NCOS measurements	50
TFN003 incoming trunk group measurements	50
Expensive route warning tone	51

Queuing features	51
Interchangeable numbering plan area	52
Carrier access code	54
Flexible numbering plan	54
Supplemental digit restriction and recognition	54
Basic Alternate Route Selection (BARS) implementation	55
Network Alternate Route Selection (NARS) implementation	71
1+ Dialing dialing plan implementation for Interchangeable NPA codes	89
Uniform 1+ Dialing dialing plan implementation for Interchangeable NPA codes	90
Network implementation of Equal Access	97
Equal Access restriction configuration for BARS or NARS	97
Configuring BARS or NARS for Equal Access routing	99
List of terms	103
